Label Holder System

Akro-Mils announces the availability of the Kanban Extended Label Holder, which transforms AkroBins and shelf bins into a complete, single-bin Kanban system. It is available in two sizes and features a bright orange flag that slides out to indicate that stock is low and the bin needs to be refilled. The label holder features a 2 x 4-inch angled face for easy label viewing and scanning.

It can be installed on a bin with the level area facing upward, to view on low shelves or louvers, or downward, to view on high shelves or louvers. The label holder works with Akro-Mils' AkroBins 4-inch shelf bins (except 30110), 6-inch Shelf-Max bins, and 1800 Series AkroBins.

Temperature Monitoring System

Hampshire Controls Corporation offers the MPS, Multi Probe Alarm System. This stand-alone system provides monitoring using up to four probes. Features include a relay output

for each probe, battery back-up, minimum/maximum setting options, and adjustable alarms. The notification system includes email, phone, and pager, and the system can be operated with network and landline telephones.

Pneumatic Tube Carrier

Atreo Services presents a single latch, end-opening, 6-inch sealed carrier for safe transport of pharmaceuticals in common, brand-name pneumatic tube systems. The sealed carrier features an end-opening design that enables users to hold the carrier with one hand while loading

contents and latching it shut with the other, eliminating the potential for unlatched transport and overstuffing of contents that can lead to tube system failure. The high-impact polycarbonate body is capped with energy-absorbent rubber ends for strength, quiet delivery, and vertical standing. A variety of carrier options are available, with colored ends and a clear body for easy content identification, and are compatible with most 6-inch tube systems.

Window Strip Vials

Health Care Logistics offers calibrated window strip vials that allow users to view the amount of medication inside each container. Vials are available in amber and white, are calibrated from 4

mL to 30 mL, and feature clear window strips. When used with calibrated droppers, they enable delivery of oral liquid narcotics and similar medications. White droppers are calibrated at 0.25, 0.5, 0.75, and 1 mL and at 5, 10, 15, and 20 mg, and black droppers have nine calibrations from 0.2 mL to 1 mL. Caps also are available to secure vial contents.

Glycol Bottles for Vaccine Storage

CAS DataLoggers announces the availability of glycol bottles to buffer probes and prevent erratic temperature readings and false alarms. For real-time viewing and alarm capability, Accsense temperature data loggers send automated phone alarms to help protect valuable vaccines

from refrigerator failures and other unforeseen disasters. The glycol bottles address the CDC guidelines that request children's vaccines use a temperature buffer inside their medical refrigerators and freezers to stabilize probe readings, which prevents widespread loss of supplies.

Electronically Locking Medication Box

Medicus Health presents its compact medication box with an electronic programmable lock. The medication box provides audio/visual feedback and warnings, has a battery life of over 10 years, and the electronic programmable lock

comes with three different passwords: master, service, and user (lock programming instructions are included). All programming is controlled via the master password. The eco-friendly box helps avoid battery changes, measures 10 x 7 x 7 inches, and is constructed of heavy, 20-gauge, powder-coated steel with single-door construction. A top-mounted handle allows for convenient transport, and a full-length, stainless steel pinned door hinge prevents pin removal. The box comes with predrilled holes for mounting on a wall, cabinet, or other solid surface. The standard color is beige, but custom colors are available.

Compounder Verification Program

LDT Health Solutions offers the LDT-CV program, a compounding verification program that ensures that outsourcing compounders are in full compliance with all the prevailing standards and regulations, especially since the adoption of the Federal Drug Quality & Security Act. The LDT-CV program is a subscription service that provides quality reports to ensure that contracted outsourcing facilities adhere to all prevailing statutes, rules, and regulations. The program is designed to enable national and local providers to demonstrate that they comply with known

industry standards, including the new 503B provisions of the FDCA, and to communicate these quality indicators in a way that is supported by an independent third party.

Pediatric Verification Software

RxScan releases IDBaby mobile for Windows Mobile 6.1 devices, which instantly verifies that the baby's bar coded wristband matches that of the parent's, as well as items such as milk bottles, charts, cribs, and bassinets. The verifi-

cation software provides electronic documentation, including date and time of every interaction with the infant (eg, feeding, parental visits, bassinet/crib arrival and departure, milk collection, and patient chart access). 2D bar codes are used to confirm the mother-to-infant and infant-to-breast milk/supplemental nutrition relationship, drastically reducing the risk of feeding errors and mislabeling.

Wireless Syringe Infusion Pump

Medfusion 4000 wireless syringe infusion pumps are now interoperable, allowing auto-charting of infusion data into a hospital's electronic medical record (EMR). Infusion therapy data are sent wirelessly from a Medfusion 4000 pump to the hospital's PharmGuard Server software, allowing clinicians to view, evaluate, and print information to help with continuous quality improvement initiatives. The new PharmGuard interoperability software add-on module for the PharmGuard Server software allows for automatic charting directly into patient records on the EMR system via Integrating the Healthcare Enterprise (IHE) profiles.

Sporicidal Disinfectant and Cleaner

PeridoxRTU sporicidal disinfectant and cleaner cleans and disinfects using a simple one-step process. The product also can be used for hazardous drug decontamination and chemotherapy spill clean up, and removes drug residue without harming equipment. PeridoxRTU's patented, hyperactive chemistry provides a 3-minute sporicidal claim, a 2-minute virucidal and bactericidal claim, and a 1-minute fungicide claim, and leaves minimal residue on surfaces. Unlike bleach, PeridoxRTU will not damage stainless steel.

Prescriber Verification Subscription Service

With access to Healthcare Data Solutions' Prescriber Verification Subscription Service (PVSS), pharmacies can ensure compliance with Schedule II regulations as they pertain to hydrocodone combination products. By using

data from the Medi-Span controlled substances file, HDS users have access to the data required for compliance with US regulations, including updates as those regulations change. The combination of HDS' PVSS real-time validation solution with Medi-Span data on controlled substances provides pharmacies with a seamless solution that protects against business disruptions and potential fines.
