

Product PORTFOLIO

Rubbermaid® Medical Solutions products include a full suite of mobile carts and wall mounted work stations that assist in point-of-care documentation, medication administration and medication delivery. Our product development focuses on providing caregiver workflow advantages and improving the integration and acceptance of technology into the patient care process.

Mobile Computing Cart from Rubbermaid® Medical Solutions

The new Mobile Computing Cart from Rubbermaid® Medical Solutions is the latest evolution in mobile computing. Its compact lightweight design, superior ergonomics and comprehensive set of features make it ideal for nursing. Quick set-up and an easy to service design maximize up time and optimize return on investment. Features include a compact 17" x 17" base, 20" of total height adjustment, ergonomic push handles, fully adjustable keyboard and a quick integration hub for USB and video. A large work surface with spill retaining lip, internal cable management and remote power management software are also included. Powered and non-powered versions are available.

Medication Cart from Rubbermaid® Medical Solutions

The new Medication Cart from Rubbermaid® Medical Solutions combines a smaller base module with the latest innovations in Medication Administration. The Medication Cart incorporates essential features for nursing while ensuring medication and supplies stay organized and secure to the point of care. Features include a 17" wide base, electronic PIN code access that can be managed remotely, 15" electronic height adjustment, large work surface with spill retaining lip, waste bin and med cup dispensers. Drawers are available in configurations of 2, 5, and 8 with the option to add 2 locking side-bins. Open technology platform supports all devices.

Mini Med Module from Rubbermaid® Medical Solutions

The Mini Med Module from Rubbermaid® Medical Solutions redefines medication administration by combining versatile, compact design with high capacity storage, providing nursing with the ultimate solution to move medications securely to the bedside. Modules can be trained together for increased capacity and efficient delivery from pharmacy to the patient floor. Mini Med Module features include a compact 14" wide base, 9" wide top, integrated waste bin, electronic PIN code access, and capacity for up to 12 medication drawers. The module can accommodate the new Motion C5 Tablet, PDA's, or can be used as a stand alone medication delivery cart.

Transfer Cart System from Rubbermaid® Medical Solutions

Rubbermaid® Medical Solutions is pleased to offer a full line of transfer and exchange carts to support the efficient and secure flow of medication from pharmacy to the units. These carts are an integral part of the hybrid medication delivery system that Rubbermaid pioneered with the launch of its first medication workstation in 2004. All transfer carts include key locks to ensure medication can be transported securely through the facility. Exchange carts include electronic keyless entry systems that can be remotely updated, allowing for safe storage in the hall or med room.
