

Product PORTFOLIO

Talyst™ enables the intelligent pharmacy. The company provides automated systems to hospitals and other centralized pharmacies, to reduce costs and increase productivity, while improving accuracy and patient safety. Its equipment and software are used to package, barcode, store, and track drug inventories. For more information, see www.talyst.com or call 877-4-TALYST.

Create your Intelligent Pharmacy Suite™ with Talyst

Talyst uses powerful software and a suite of reliable hardware components to connect your pharmacy like never before, enabling greater patient safety, improved efficiency, and control of your inventory. Our unique AutoPharm® software platform manages your entire pharmacy inventory and can support remote locations and multiple hospitals. AutoPharm can streamline refilling your automated dispensing units (ADU) and patient-specific cartfill.

Pharmacy integration is always on your terms with Talyst. We can deliver a comprehensive pharmacy automation system built around AutoPharm, or satisfy specific packaging, labeling, or medication storage needs with hardware components designed to interface with your current hospital information system and wholesale relationships.

AutoCarousel™ provides maximum medication storage in an organized, space-saving footprint. Its easy-to-use vertical design provides secure, automated storage and accurate retrieval.

- Streamlines stocking and picking activities using pick-to-light indicators
- Decreases required storage space by 30% to 50%
- Reduces time-on-task and staff required to fill orders

- Provides added security for medications
- Enables you to easily store, track, and access medications

AutoLabel™ allows barcode labeling of virtually 100% of your formulary. It utilizes a special, patent-pending transfer label to ensure your medications have a scan-ready barcode and a human-readable label.

- A Flag Label™ for vials and ampoules allows part of the transferable label to move from the original container to the syringe
- Creates transferable circle labels for barcoding multi-dose medications like ointments, eye drops, and inhalers

- Nurse-friendly labels assure a consistent, readable barcode makes it to the bedside for scanning

AutoPack™ integrates easily with your pharmacy system to provide a fully automated packaging system for oral solid medications.

- Automates 100-500 oral solid medications with a single AutoPack
- Delivers unit-dose or multi-dose packages in a compact footprint
- Provides 19 lines of user-defined label space
- Works seamlessly with AutoCarousel to ADU, cartfills, and canister refills
- Processes up to 60 doses per minute, recognizing priority orders for immediate packaging

AutoCool™ provides secure storage and automated dispensing for your valuable refrigerated medications. It's flexible, scalable, and can be installed in remote locations.

- Pharmacy-grade refrigeration with password-protected access
- Supports bar code confirmation of all stocking, picking, and dispensing
- Enables perpetual inventory management with par-levels and order preparation
- Synchronizes all fulfillment activities when used with Talyst AutoCarousel™ and AutoPack™
