- Incontinence needs
- Wheelchairs, walkers, nebulizers, commodes, crutches, bath benches, etc.

Medication Questions? Answers are a scan away

Every PRMC Home Scripts medication label features a QR Code that when scanned by a smart mobile device launches the easy-to-use PRMC Home Scripts Meds on Cue app.

Each QR code on the label is specific to the medication inside the bottle and allows patients the opportunity to view a brief video explaining the drug, its proper use and importance.

Patients may also use the Meds on Cue feature to speak directly with a PRMC Home Scripts pharmacist, set reminders to take their medications and when to refill them, and also obtain other valuable information, like what the pills they are taking should look like.

To learn more, scan the QR code below.
