

**Disposable Infusion Pump Pouches**

Attentus Medical Sales launches Fit Right Pouches, a full line of disposable infusion pump pouches. These pouches are designed to provide a great combination of flexibility and durability not normally found in single-use bags. Attentus Fit Right Pouches are constructed of durable fluid-resistant material, with exclusive sound transmitting mesh patches for better patient safety. These packs are design to fit all major brands of pumps and 250 mL, 500 mL, 1500 mL, 3000 mL, or 4000 mL of fluid, depending on the model.

**TPN Management System**

Now available from B. Braun, the Pinnacle TPN Management System allows pharmacists to enhance TPN productivity with accelerated delivery, while enhancing safety with bar coding technology. The sys-

tem's Windows- and browser-based TPN software provides automated TPN calculations, nutritional assessments, aluminum calculations/warnings, and incorporates Trissel's Ca/P Check Software. Pinnacle also offers a touch-screen, pull-down menus, and automatic quality checks, and can compound one L in less than a minute.

**Temperature Monitoring System**

The i.Series line of temperature-controlled products from Helmer includes the i.Center Integrated Monitoring System. Independent from the temperature controller, the i.Center features automatic high/low

alarm testing, an event log to record alarms with date and time, and a LCD temperature graph that displays 24 continuous hours of data. Additionally, the i.Center offers on-screen help information and password-protected configuration. The i.Center is exclusive to Helmer and is featured on i.Series refrigerators, freezers, and platelet incubators.

**2-mL Oral Dispensers**

Baxa announces the release of its new 2-mL Exacta-Med Oral Dispenser. Exacta-

Med Oral Dispensers can aid in the prevention of wrong-route administration of non-IV fluid drugs; their dispenser tip cannot connect to a luer needle hub, needleless connector, or patient IV access device.

**Bucket-less Mopping System**

ITW Texwipe introduces the Alpha Belt Mopping System (TX7211), designed to facilitate efficient bucket-less mopping in the cleanroom or controlled environment. The system includes a cleanroom-laundered polypropylene belt with a side-release buckle (nylon/acetal), two plastic rings, and 20 polyethylene cleanroom bags. Each component is double-bagged.

**Dispensing Spike for Reconstituting Medications**

EPS's Dispensing-Spike II Reconstitution Device was developed for use in reconstit-

ing medication from multiple dose IV vials, while providing sterile air filtration. The Dispensing-Spike II has a large, 0.2-micron hydrophobic air filter to trap aerosol meds and minimize blowback. Its streamlined construction creates short venting and fluid pathways, and the sharp, thin spike minimizes coring and permits easy penetration of rubber stopper vials. The luer lock port maintains a secure closure between the device and the syringe. The hinged cap and spike sheath help maintain sterilization before use, minimize touch contamination, and can provide a closed system for disposal.

NEW

& NOTEWORTHY

**Cleanroom Pass-Throughs**

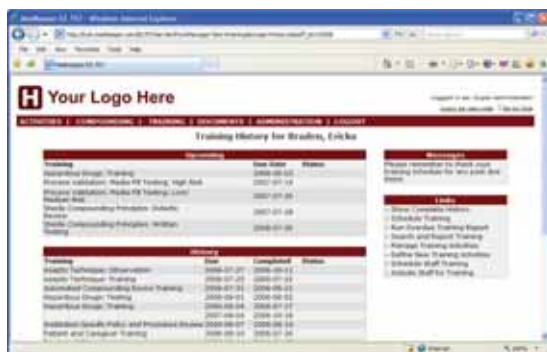

R.C. Smith introduces another option to their line of Pass Thru Solution Storage Modules. The new version incorporates an innovative "Uni-Track Shutter" that automatically closes one side of the pass-through when the opposite side is opened. The "Uni-Track" promotes a positive air pressure differential and minimizes air particulate counts to help pharmacies achieve <797> compliance.

**Compounding Quality Software**

MedKeeper announces the release of ez797 version 2.0, a customizable sterile product quality system. The new version offers a streamlined interface, enhanced customization features, advanced notification options, and full integration with the suite of MedKeeper applications.

ez797 version 2.0 offers a single sign-on for all MedKeeper applications, the ability to record almost all activities in two clicks or less, automated e-mail alerts based on missed or failed activities, improved reporting and

exporting functionality, and customizable online forms, such as compounding worksheets, early release registers, and sample testing logs.

**Compounding Aseptic Containment Isolators**

NuAire's PharmaGard compounding aseptic isolators can help assure your compliance with USP Chapter <797>. The PharmaGard NU-PR797 Positive Pressure Compounding Aseptic Containment Isolator provides ISO Class 5 air quality for the preparation of sterile products. The PharmaGard is also available in two negative pressure

models for the preparation of antineoplastic agents: The Negative Pressure Re-circulating NU-NR797 and Negative Pressure Total Exhaust NU-NTE797. NuAire's ergonomically designed isolators are constructed of stainless steel with seamless interiors and exteriors and centrally located control centers.
