

A Comprehensive, Web-Based Sterile Compounding Curriculum

From the Authors...

"The CriticalPoint e-learning modules are written in a concise manner, with an abundance of photographs. A student can sit in their own environment and learn about the components of USP Chapter <797> at their own pace. Several themes, such as remembering the patient, are used throughout the modules and tie them together in a thoughtful way. The environmental monitoring modules that Paula H. Vance and I wrote include a module on the basics of air sampling, so that the student understands why they are performing air sampling, as well as how to do it."

■ **Alice S. Weissfeld, PhD**
President and CEO
Microbiology Specialists Incorporated

"The CriticalPoint training modules present a unique opportunity for pharmacists and technicians to gain current and valuable information regarding the accepted standards of practice for aseptic technique and sterile compounding methods. The added advantage of a Web-based module is that the information will be constantly updated. This real-time technology assures that all health care professionals will be on the cutting edge of information regarding ongoing USP Chapter <797> updates and additions to industry-recognized standards of practice. The robust, well-rounded content is provided by authors representing many facets of pharmacy, microbiology, and cleanroom technology, and will allow users to gain information on a variety of topics not previously combined into one program."

■ **Holly Simmons, RPh**
Executive Director of Pharmacy Operations
HomeChoice Partners, Inc., and President
Impact Solutions Group, Inc.

"The CriticalPoint e-learning modules provide consistent information from industry experts, and the Internet-based system allows employees to take the modules based on their schedule. CriticalPoint provides management with the ability to track the employee's progress for completing each e-learning module. This investment in your employees will reap benefits daily."

■ **David L. Thomas, RPh, MBA**
Vice President
Certified Consultant Pharmacists, Inc.

Pharmacy Purchasing & Products is pleased to bring you CriticalPoint's ACPE-approved, Web-based Sterile Compounding Curriculum, authored by internationally recognized sterile compounding experts, such as:

- | | | |
|--------------------|-----------------|-------------------|
| ■ Eric S. Kastango | ■ Holly Simmons | ■ Alice Weissfeld |
| ■ James Wagner | ■ Kate Douglass | ■ Paula Vance |
| ■ Patti Kienle | ■ Dave Thomas | |
| ■ Luci Power | ■ Eden Venti | |

Each author has **practical, in-the-field experience** and understands the challenges of pharmacy practice.

These 32 **Web-based training** resources meet **USP Chapter <797>'s competency assessment requirements** and cover all of the key areas of your overall quality assurance program. The modules are **up-to-date** with the current and proposed revisions to USP <797>.

Modules are available in the following topic areas:

- ▶ Fundamentals of Aseptic Compounding
- ▶ Personnel Training
- ▶ Compounding Practices
- ▶ Engineering Controls and Equipment Use
- ▶ Environmental Monitoring and Maintenance
- ▶ Documentation and Policy and Procedures
- ▶ Hazardous Drug Compounding Practices

This **comprehensive** set of training tools ensures that each of your staff members receives **complete and consistent compounding education**. The **step-by-step, "how to"** format of each module provides compounding personnel with a solid foundation of best practice recommendations from top industry experts. Furthermore, the program is **economically priced**; pharmacies spend just \$320 per employee per year, averaging \$10 per module, per employee.

And because they are Web-based, users can **complete the training at home, in the office, or from any location** with a PC and an Internet connection. CriticalPoint also **offers an administrative reporting module**, so directors can track the sections their employees have completed and run reports whenever they need to.

These modules are an easy and convenient way to get your staff up to speed on best compounding practices and to **ensure the safety of your patients**.
