

Facility and Department Information

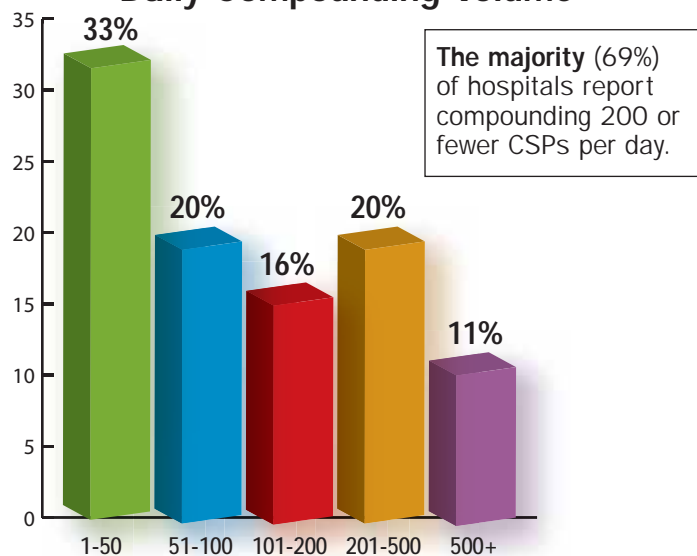

Facility Size (in number of beds)

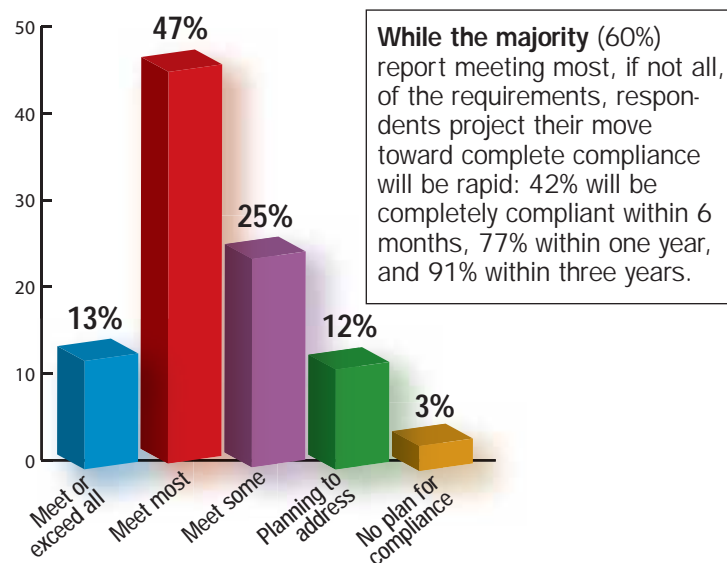

General Facility and Department Information

Our survey results are based on the responses of pharmacists from a balanced cross-section of hospitals nationwide, with all facility sizes, locations, and compounding volumes represented. 69% report having read the new changes to <797> and another 21% report having “sort of” read them. A majority (85%) of respondents are aware of their state board’s position on requiring compliance with <797>. *Additional information on the numbers of FTEs our respondents dedicate to compounding is available for download on www.pppmag.com.*

Daily Compounding Volume

Current Compliance with USP <797> Requirements
