

Physician Order Management Systems

Physician order management systems continue to benefit from the move toward automation. Looking to the future, however, many facilities are projecting a slower rate of adoption and the overall number of facilities planning to adopt these systems within the next five years has decreased from last year's predictions. **For more information on physician order management systems, circle reader service number 919, or visit www.findit.pppmag.com**

User Satisfaction

► **87% of users** find their physician order management system satisfactory or better.
