

Product PORTFOLIO

*med***DISPENSE**

medDISPENSE produces a line of automated medication dispensing equipment engineered for the needs of hospitals that have traditionally found such equipment to be financially out of reach. Hundreds of med-surg, LTAC, nursing home, specialty clinics, and psychiatric facilities across the country have chosen *medDISPENSE*. Why? Three reasons: affordability, easy of use, and reliability. Simply put, *medDISPENSE* provides the best medication dispensing automation at the lowest cost. Moreover, customer support is excellent and available anytime, anywhere in the U.S.

In the *medDISPENSE* product line there are the three following Base Units:

Base 25

Base 45

Base 72

A **Base Unit** is a primary piece of equipment that the nurse uses to pull patient medications. The Base Unit contains a computer and a touch screen. It is also used to control any optionally attached Auxiliary Units.

medDISPENSE's line of Auxiliary Units consists of:
Combo Tower (top left) – a tower holding 45 standard drawers on the bottom and 5.6 cubic feet of shelved bulk space on top.

Supply Tower (top right) – a full tower with 11.2 cubic feet of shelved bulk storage space.

In addition to Base and Auxiliary Units, *medDISPENSE* also offers:

- **Barcode Scanners**
- **Biometric ID Scanners**
- **Refrigerator Unit**
- **Half Combo Towers and Half Supply Towers for Specialty Use**
- **Double-Width Drawers**
- **Profile/EMAR Interfaces for Any HL7-Compliant Software System**
- **ADT/Billing Interface to Allow Automatic Billing and Crediting of Patient Accounts**
